

Changing bot.command section in config via !alter-config command causes the Bot to crash

Details:

Bug ID: BG_FU_1
Type: Bug
Project: “Overlady” Discord bot
Priority: Highest
Affects versions: None
Component/s: Config Extension commands
Labels: Reproducible, New
Status: New

Environment:

Windows 11 Pro 22H2.13155

WSL: 2.0.14.0

Docker Engine version: 24.0.7

People:

Assignee: None
Reporter: Zirochka

Description:

Changing the config section “bot.command” via !alter-config command results in an InvalidConfigurationException error and Bot crash after. The Bot adds changes to the config as a new command in the config.

Location:

Config Extension commands - !alter-config command - bot.command

Steps to reproduce:

1. Open test guild with “Overlady” bot
2. Input invalid data (wrong section):

```
!set-conf bot.command
```

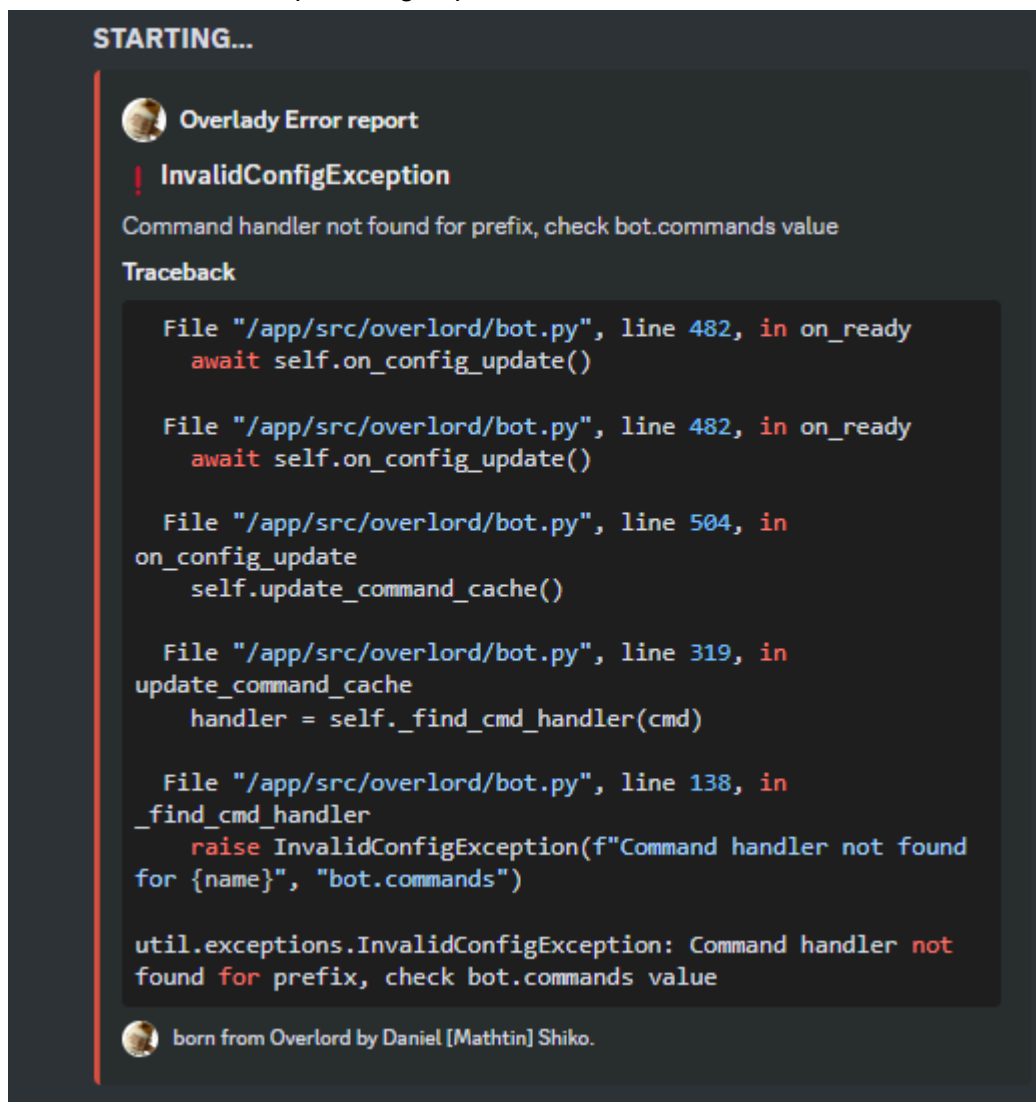

```
prefix = "?"
```

Actual Result:

Actual result gives an InvalidConfigException error.

Bot starts Traceback spamming in private chat.

Expected result:

The Bot should return to the previous valid data in the config.
